CORE LANGUAGES

- Java (8, 11, 17)
- JavaScript
- Python
- C++
- SQL

FRAMEWORKS

- Spring Boot
- Spring Security
- Vue.JS
- React.JS

DEVOPS & CLOUD

- Docker
- Kubernetes
- AWS
- Microsoft Azure
- Harness CI/CD
- Apache Airflow

DATABASES

- OracleDB
- MySQL
- PostgreSQL
- MongoDB
- Redis
- Elasticsearch

SECURITY

- JWT
- SAML
- LDAP
- RBAC

TOOLS & METHODS

- Git / GitHub / Bitbucket
- JIRA / Confluence
- IntelliJ IDEA / VS Code
- Kafka / HDFS / Hive
- Agile / Scrum

ROHIT LAVATE

Software Engineer | Backend Systems & Cloud Architecture Specialist

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 3+ years of experience designing and delivering scalable backend systems using Java, Spring Boot, and microservices architecture. Strong expertise in building RESTful APIs, identity and access management (IAM), and cloud-native applications on AWS. Hands-on experience with CI/CD pipelines (Jenkins, Harness), Docker, Kubernetes, and DevOps automation. Proven track record of improving system reliability by 30%, reducing API response times by 40%, and processing 500K+ daily requests in high-availability enterprise environments.

CORE COMPETENCIES

Java / Spring Boot | Microservices | REST APIs | AWS / Azure
| Docker / Kubernetes | CI/CD | IAM / JWT / SAML

PROFESSIONAL EXPERIENCE

Associate Lead Developer

Elliot Systems (Client – Mistplay) • India

July 2025 – Present

- Diagnosed and resolved production issues across distributed microservices, improving overall system reliability by 30% while ensuring alignment with business requirements.
- Automated and orchestrated data workflows using Apache Airflow DAGs, enabling reliable scheduled batch processing at scale.
- Supported a mission-critical enterprise platform maintaining 99% uptime for 20K+ users; contributed to incident response and root-cause analysis.
- Optimized AWS cloud infrastructure and application configurations, reducing operational costs by 10% and improving cloud-native scalability.
- Enhanced CI/CD pipelines using Harness, Docker, and Git-based workflows, accelerating release cycles by 50% and improving deployment reliability.
- Standardized Git branching and release strategies across 10+ projects, improving cross-team collaboration and delivery consistency.

Software Development Engineer – I

Morningstar India pvt Limited • India

July 2022 – July 2025

- Designed and developed Java and Spring Boot REST APIs for internal platforms, improving response times by 40% while scaling to 500K+ daily requests.
- Implemented enterprise-grade access control using JWT, SAML, and LDAP, securing application access for 10K+ users and meeting organizational security standards.
- Built role-based access control (RBAC) and approval modules, reducing unauthorized access incidents by 50%.
- Developed and optimized big data processing solutions using Hive, HDFS, Kafka, and Elasticsearch, reducing query execution times by 60%.
- Directed metadata migration application, improving data consistency by 40% and driving results through emerging technologies.
- Architected a real-time digital twin system, improving prioritization and field insights for 350+ engineers nationwide.
- Integrated LLM-based APIs to automate operational workflows, saving 200+ hours per month in manual effort.
- Collaborated with DevOps teams on CI/CD-driven deployments using Docker and Kubernetes, reducing rollout time by 50%.

KEY PROJECTS

Localized Single-Node Hadoop Cluster

Big Data Processing Environment • Personal Project

Stack: Docker • Hadoop • Spark • Kafka • HDFS

- Designed and deployed a Dockerized big data processing environment using Hadoop, Spark, Kafka, and HDFS, enabling efficient local testing, data ingestion, and analytics in a controlled development setup.

EDUCATION

Master of Technology

VJTI, University of Mumbai • CGPI: 7.5 / 10

2018 – 2022

CERTIFICATIONS

- Building Scalable Java Microservices with Spring Boot and Spring Cloud – Coursera
- Getting Started with Google Kubernetes Engine – Coursera
- Crash Course on Python – Coursera
